

# Research and Teaching Assistant Position in Mathematical Systems Theory

We are looking for MSc graduates (or equivalent) with a strong background in **mathematically oriented control engineering**. Potential candidates are expected to provide teaching assistance at the Department of Mathematics and/or in Engineering Cybernetics.

The position offers sufficient freedom to pursue a PhD degree in any area of mathematical systems theory or control engineering. A presently available concrete project is devoted to the design of distributed controllers for complex networked systems.

If you are interested please send

- a complete resume
- a letter of motivation
- the names of two professional referees

to our secretary:

Ms. Elisabeth Schaeftgen
