

Jean Monnet Summerschool: Modelling of Sentiment Indicators, 26.-29th September 2023

The chair for macroeconomics at the FernUniversität Hagen organizes a summerschool which deals with empirical modelling of sentiment indicators. Thanks to sponsorship via the Jean Monnet Programme, the course is free of charge but only a limited amount of participants will be able to join the course in person while attendance via Zoom is also possible. The course is open to graduate and PhD students

The first part of the course will cover the following topics

- Overview of sentiment indicators
- Machine learning techniques
- Spillover and connectedness techniques

During the second part of the course, selected participants will have the possibility to present their own research and discuss other ongoing projects of participants

The course will take place at the FernUniversität Hagen from the 26th – 29th of September.

Lecturer:

Joscha Beckmann, FernUniversität Hagen and Kiel Institute for the World Economy

Rainer Schüssler, Universität Rostock

Kamil Yimaz, Koc University

If you are interested in participating, please send a brief letter of motivation among with your CV to joscha.beckmann@fernuni-hagen.de and **clearly state whether you intend to apply for the full course or for only one of the two parts**. If you are interested in presenting your own work, please also attach a working paper or a extended abstract.

Application deadline: August 20th, 2023

Notification of acceptance: August 30th, 2023

Please contact joscha.beckmann@fernuni-hagen.de for further information.
